

## Lesson 4

# Web APIs

How to communicate with a  
remote resource?

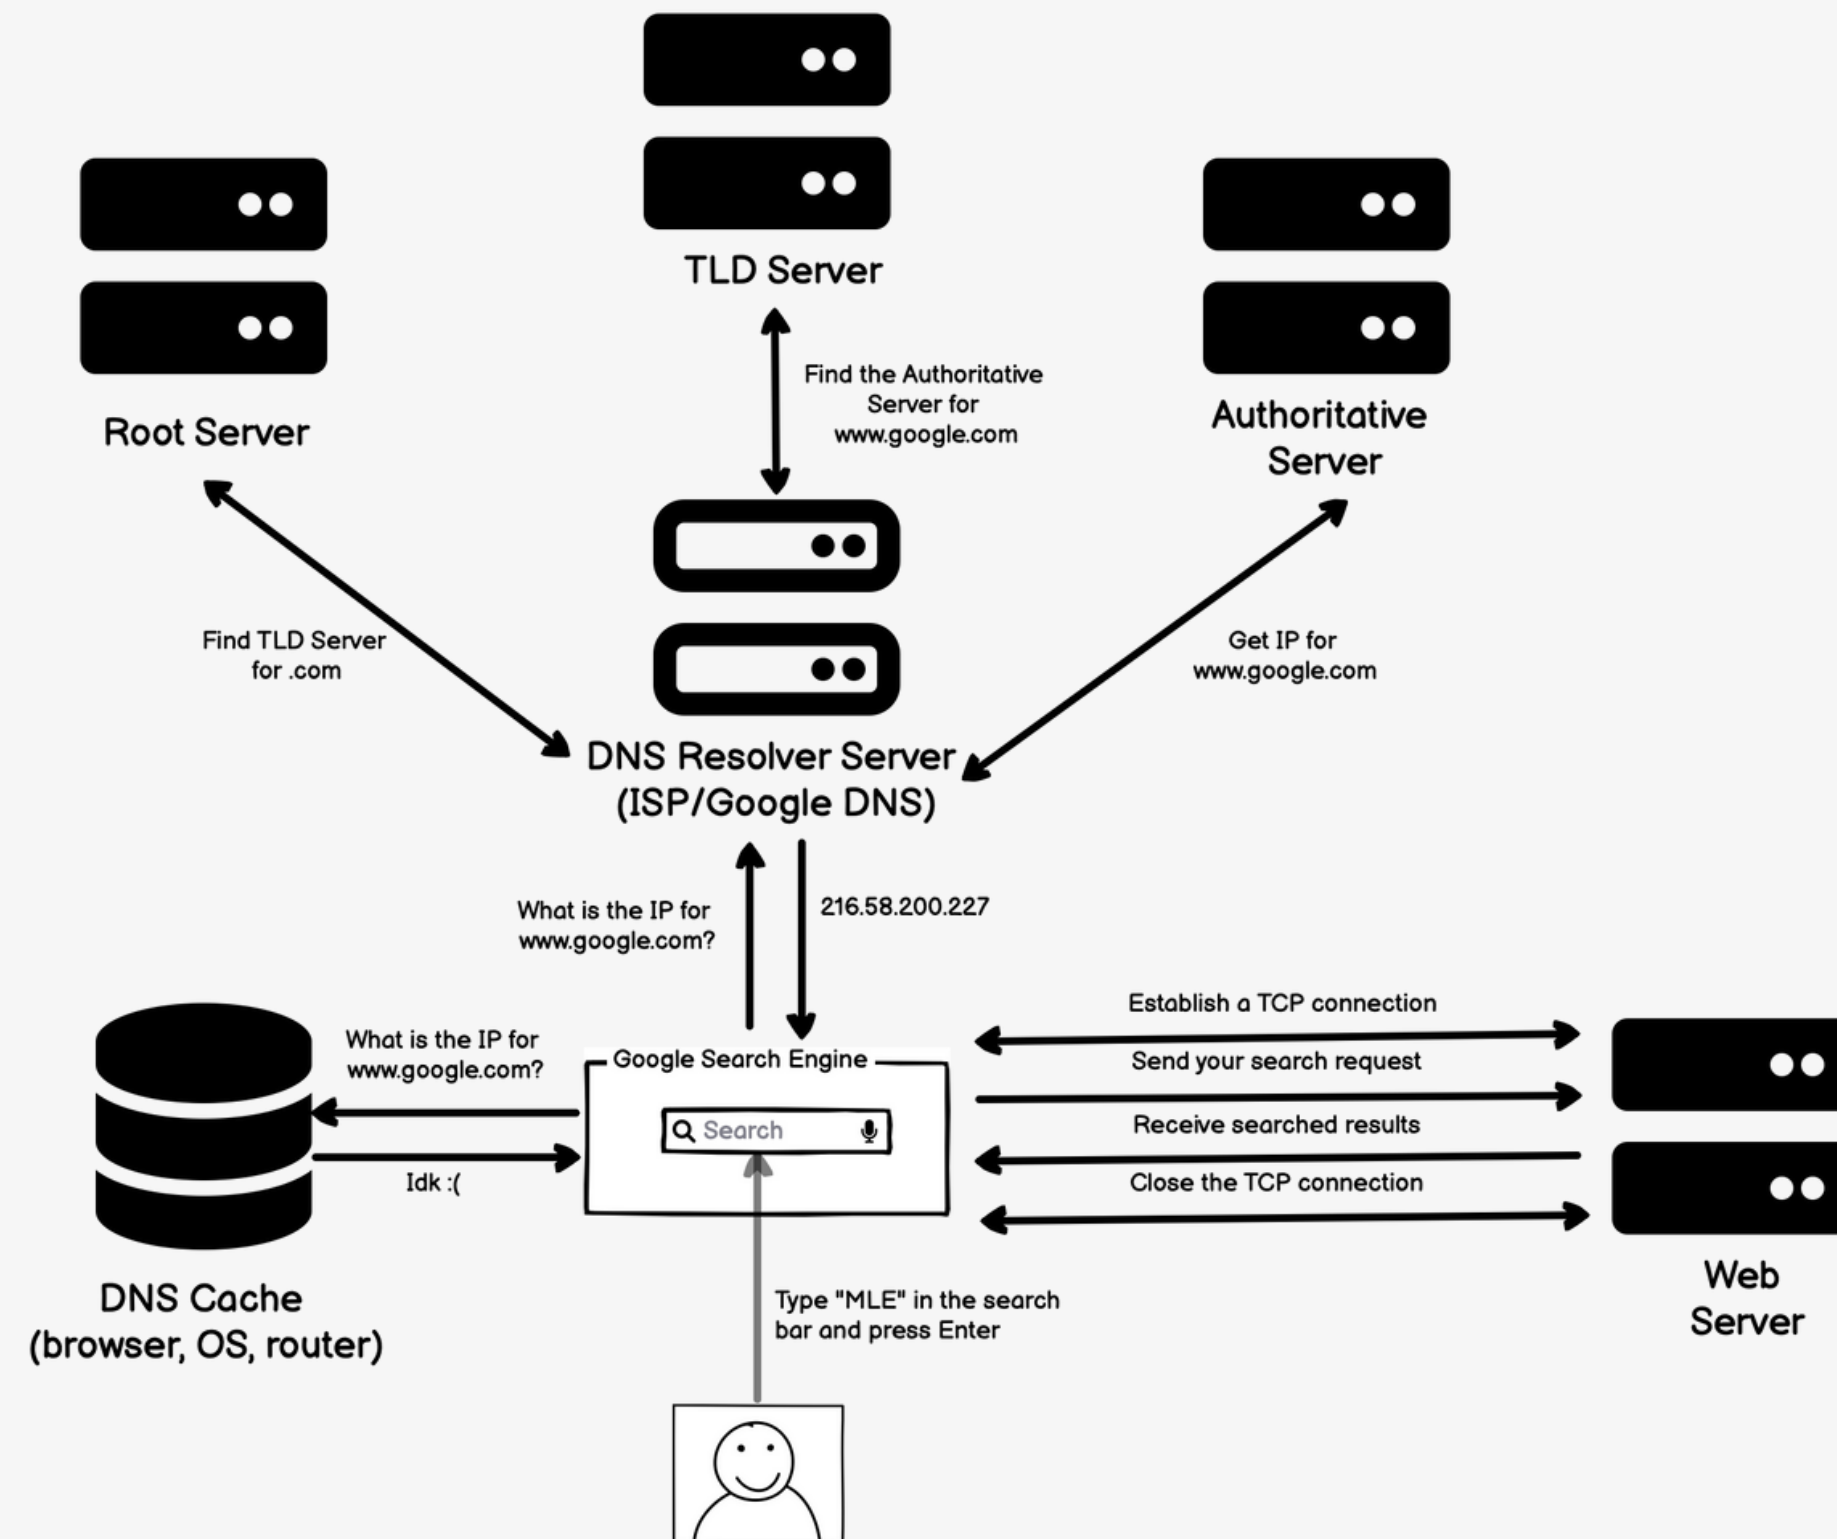

# Learn About

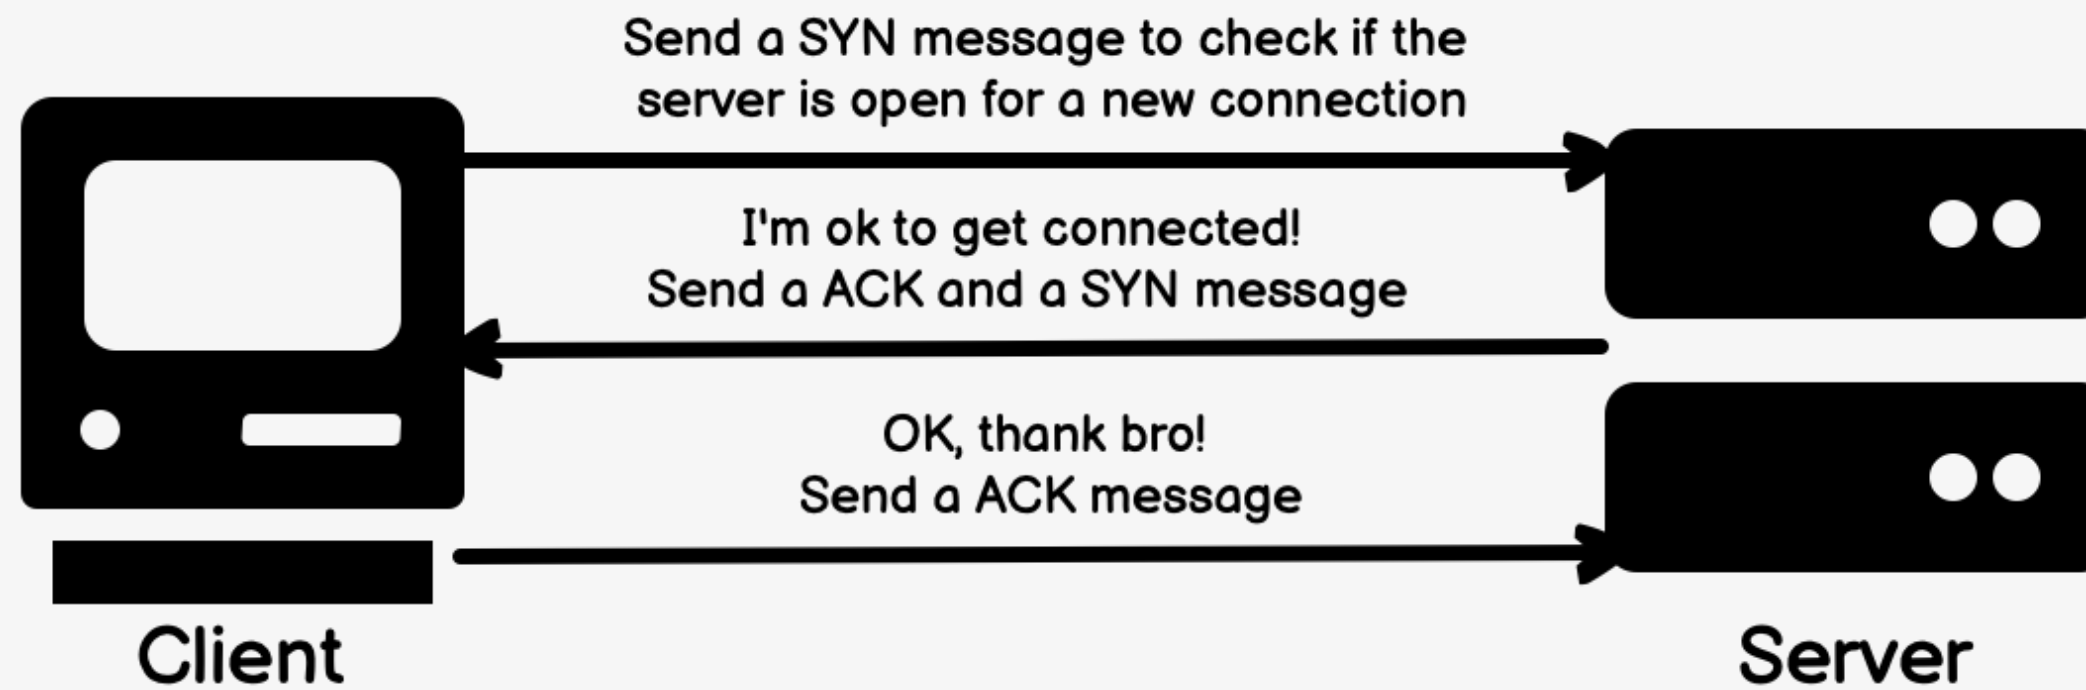

- **Behind a Google Search**
- **API Architecture Styles**
- **Software Testing**
- **Improve API performance**

# Behind a Google Search

# TCP 3-way handshake

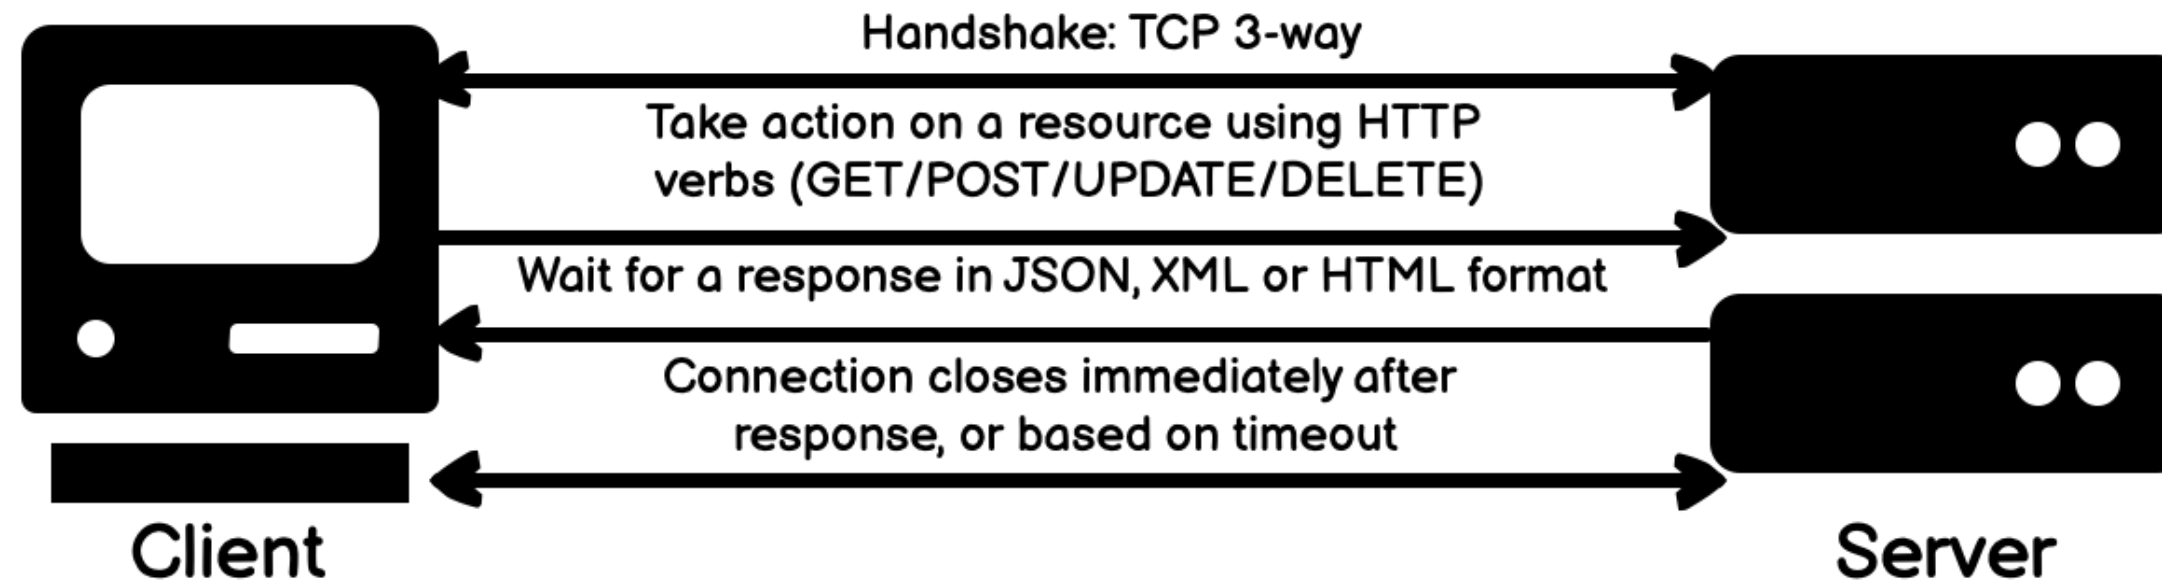

# API Architecture Styles

Multiple choices allowed

# REST API

## Pros

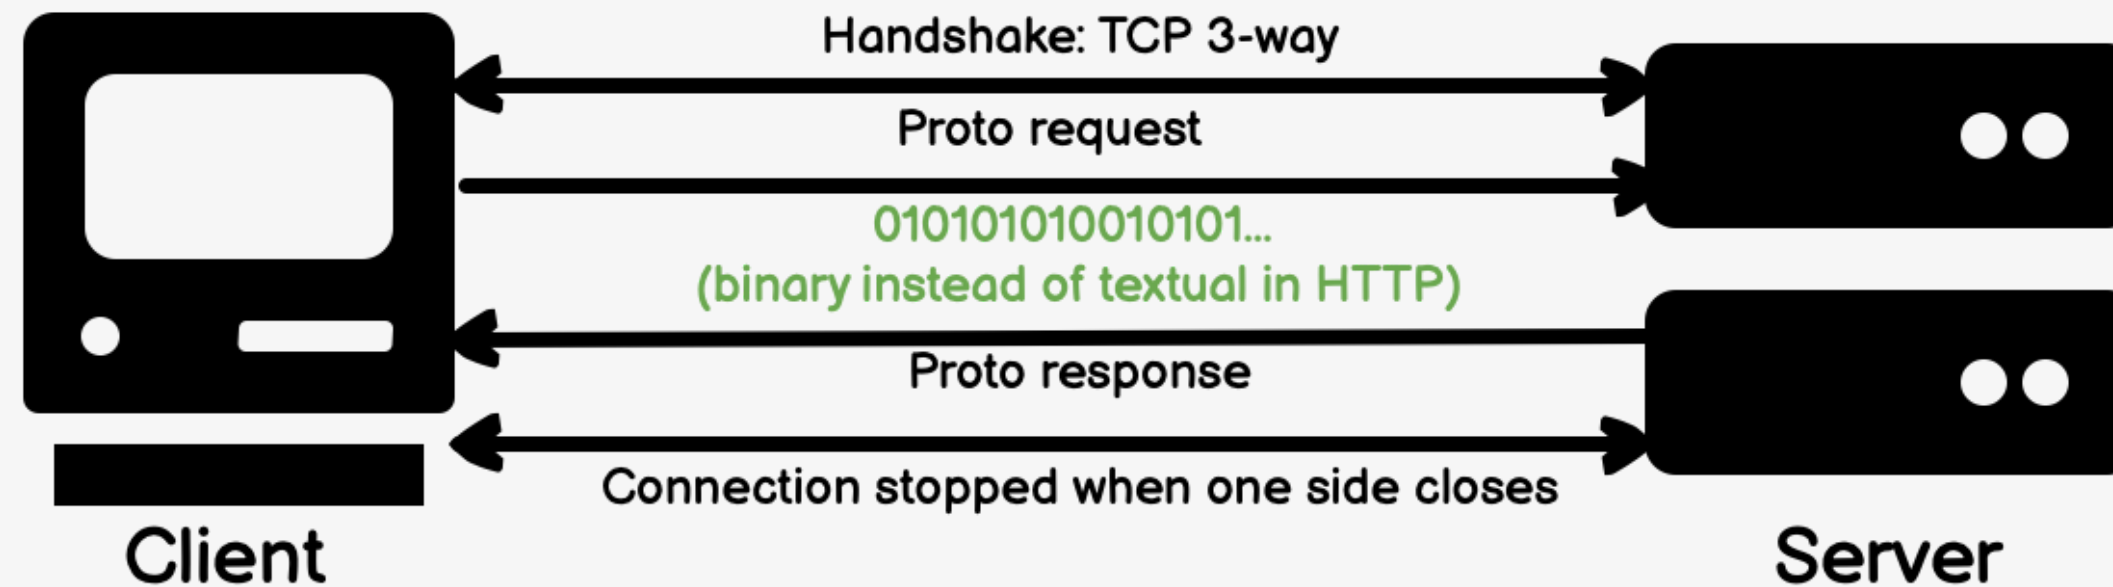

- **Easy to learn and code**

## Cons

- **Must document to communicate b/w client and server**

# gRPC

## Pros

- **Strongly typed**
- **Lightweight messages result in faster communication**
- **Support streaming**

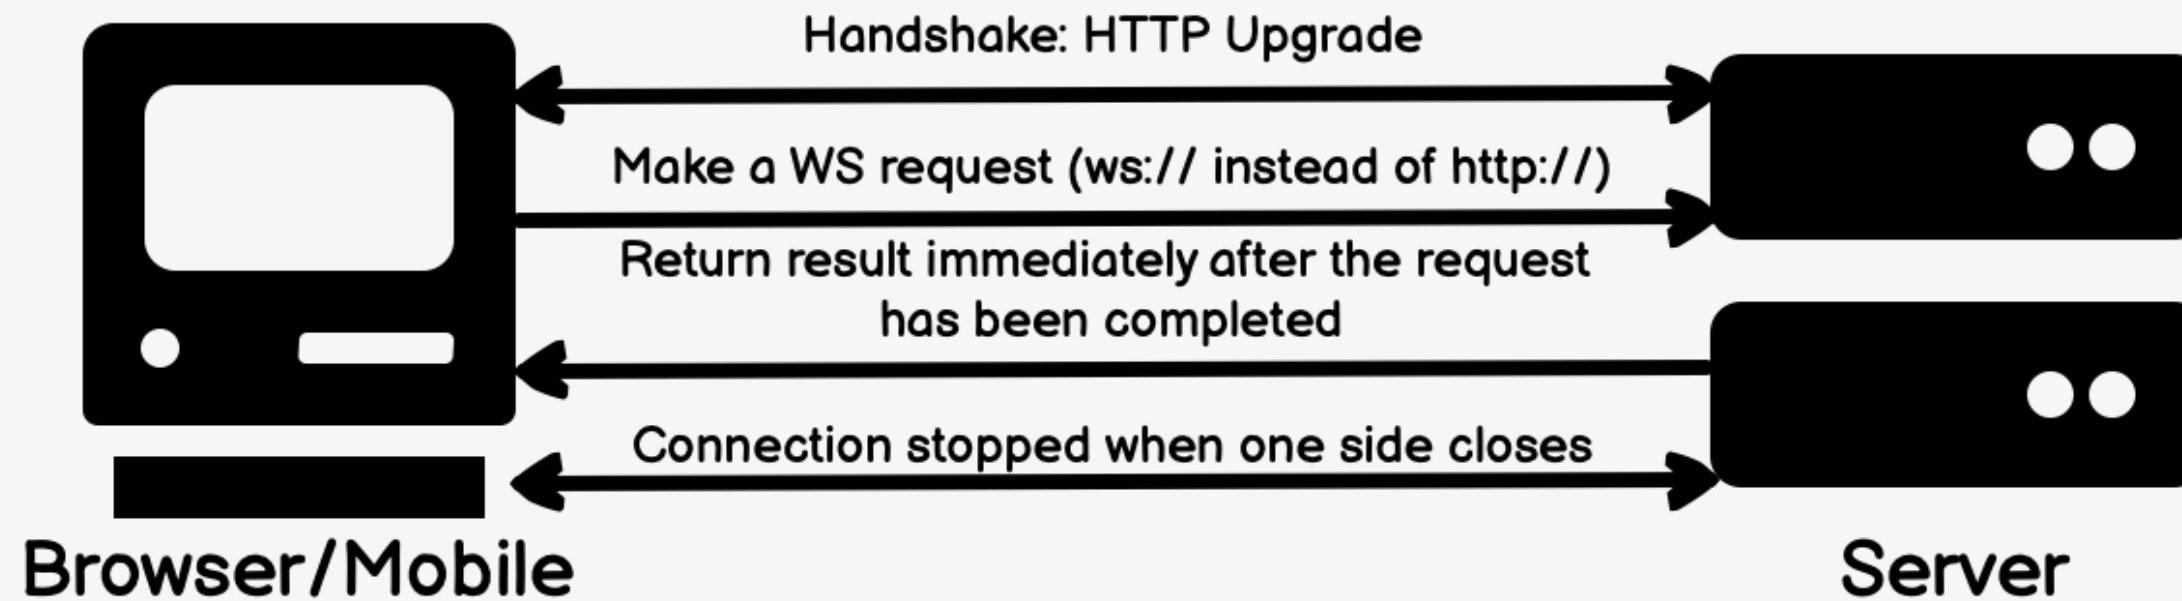

## Cons

- **Lack of maturity**
- **Can't call a gRPC service from a web browser directly**

# WebSocket

## Pros

- **Support streaming**
- **Faster than REST**
- **Call and receive a response directly from browser and mobile**

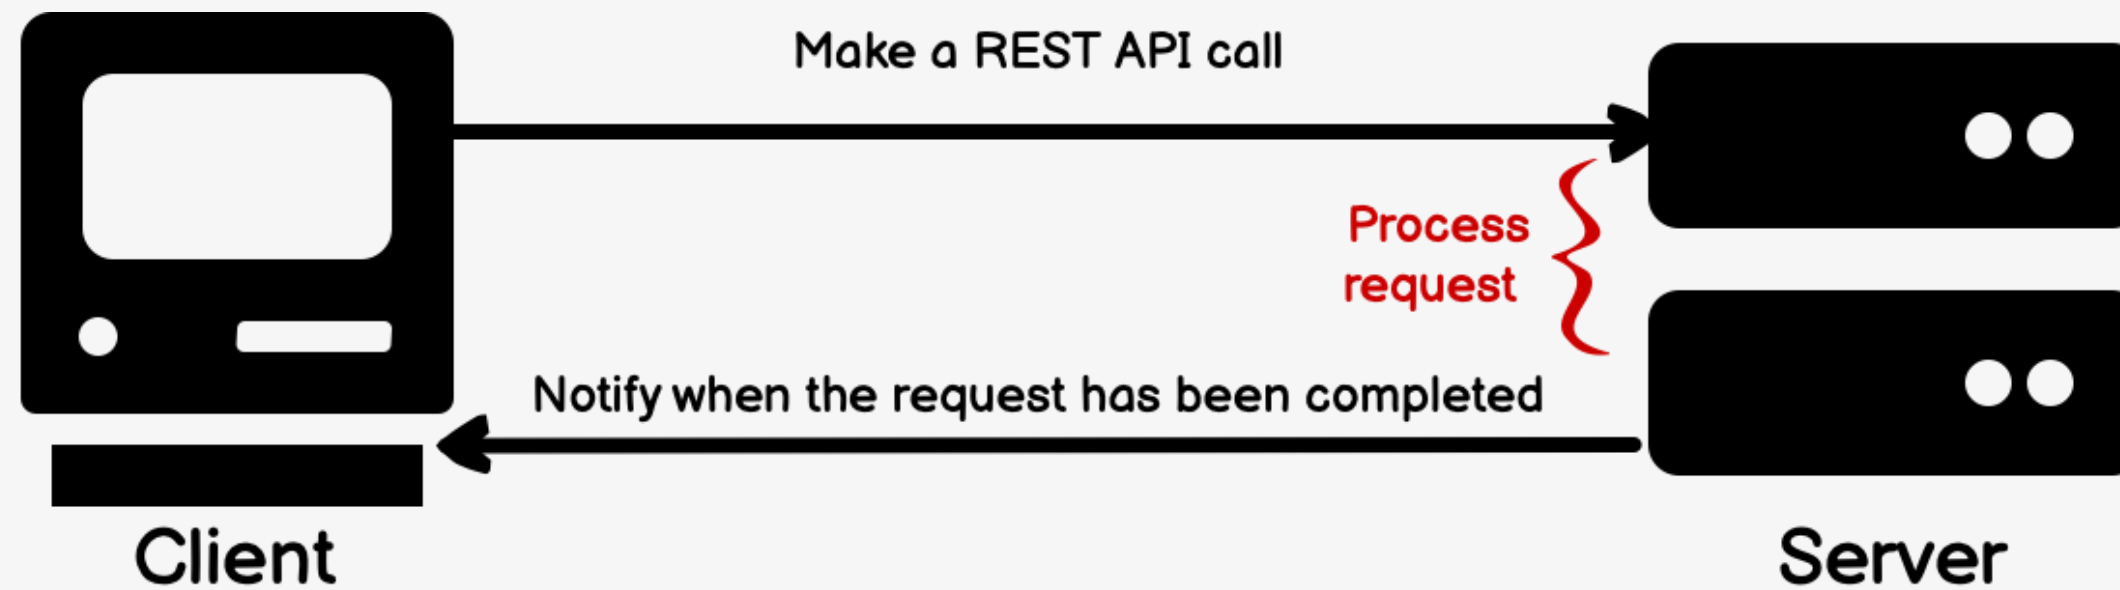

## Cons

- **More difficult to develop than REST**

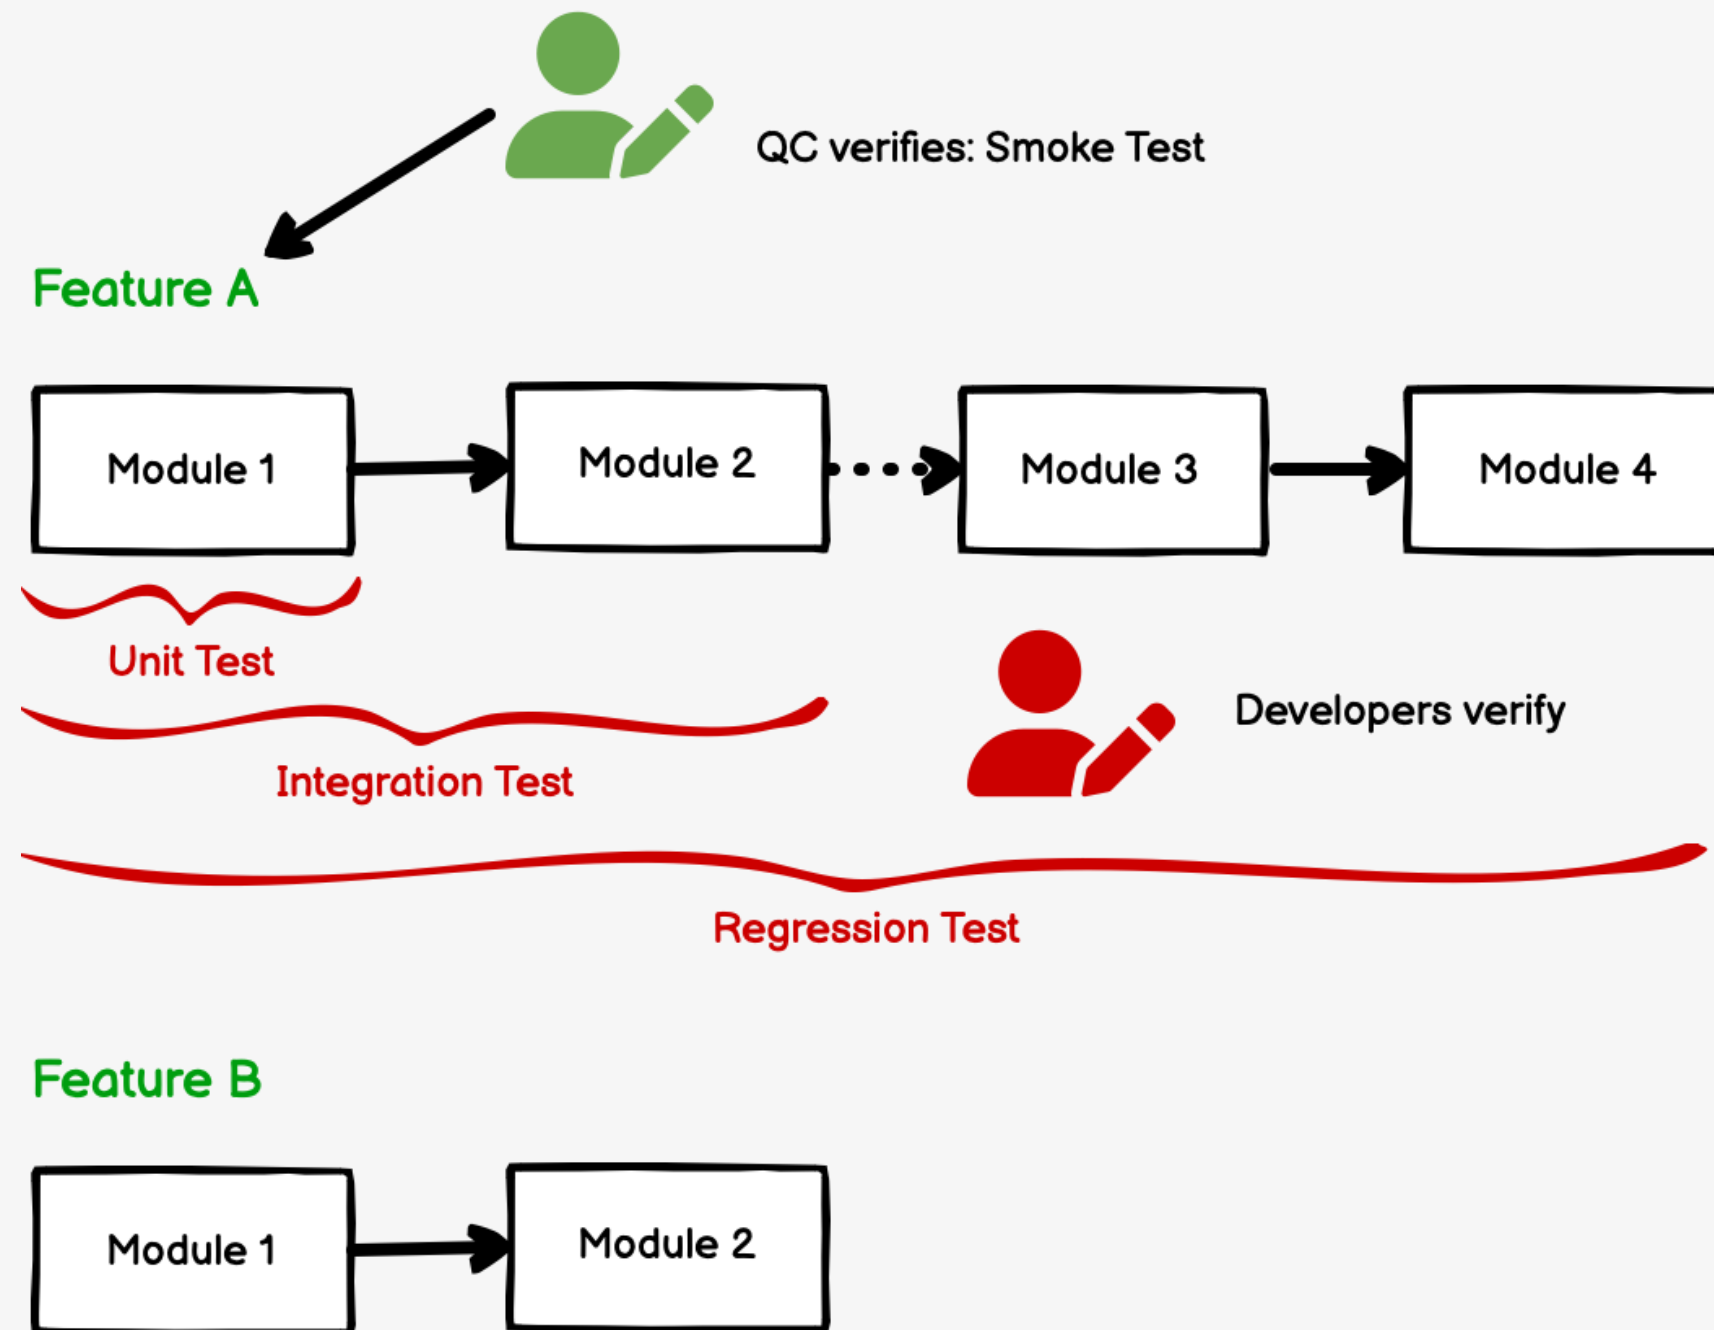

# Webhook

# Software Testing

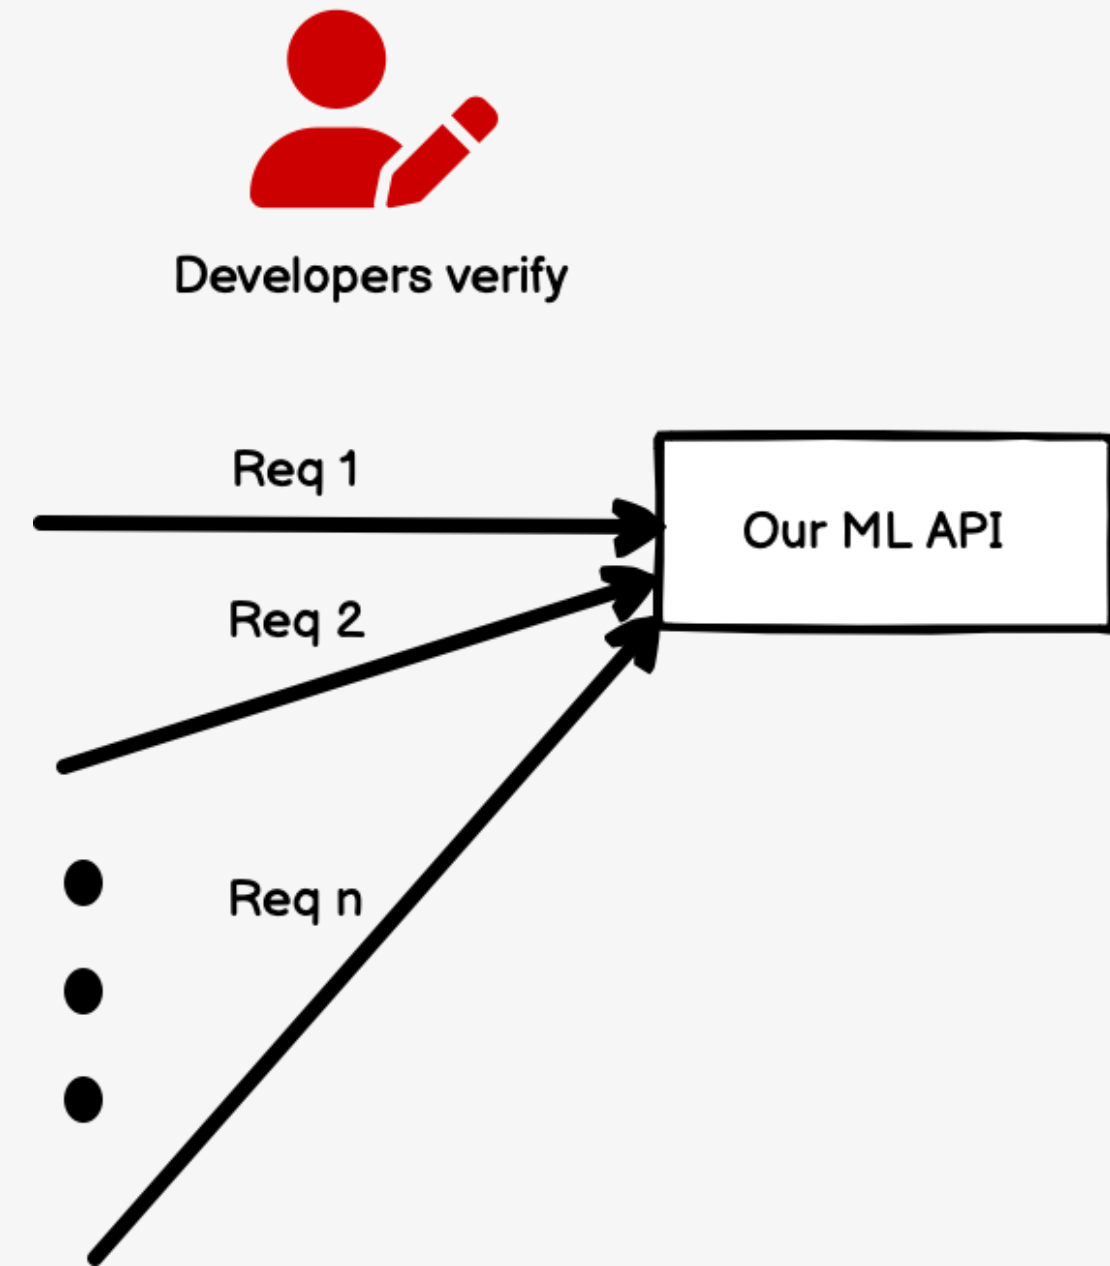

## Functional Testing

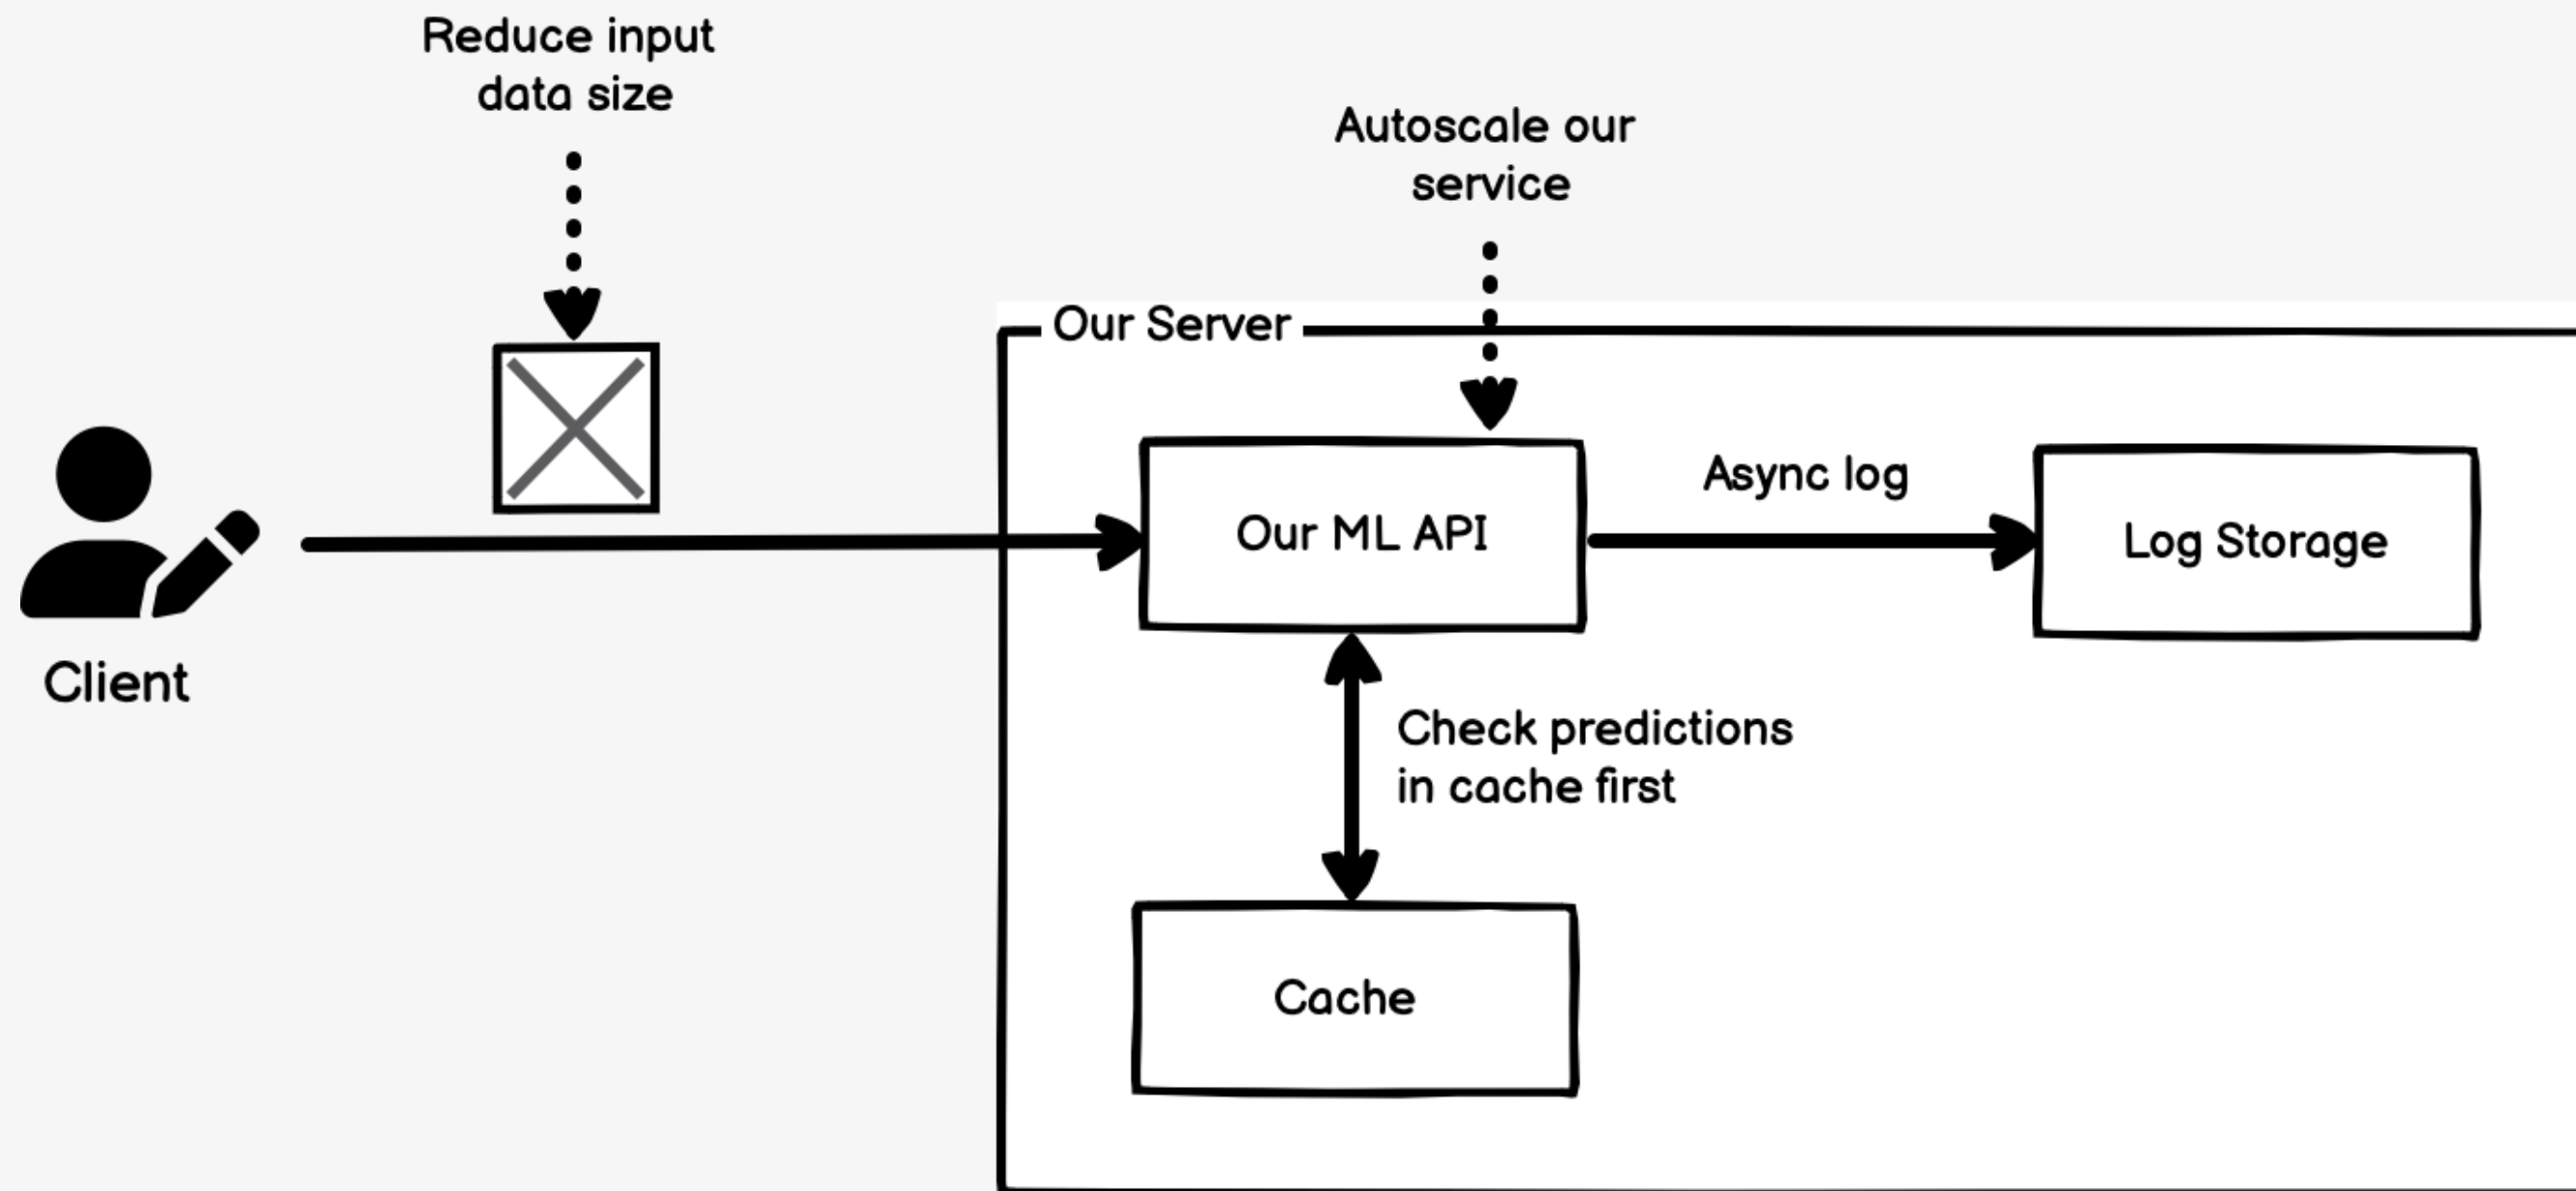

# Software Testing

## Non-Functional Testing

- **Load Test:** **what** is the upper limit?
- **Stress Test:** **how** the system reacts under unexpected load?

# Improve API performance

# Thank You!
